

# Final Course Requirements for Information System Development Methods and Tools in 2025

## Final Demonstration Time

Lecture during the 17th teaching week (June 16, Monday, starting at 9:50).

## Material Submission Time

Submit via the form and complete the peer review lottery by 20:00 on the evening of June 13 (the lottery will be distributed in the Feishu group at 19:00 on the same day), the submission link is as follows:[e9c9e17fy.feishu.cn](https://e9c9e17fy.feishu.cn)

Complete peer reviews (targeted evaluation based on random draw) by 22:00 on the evening of June 13th. The submission link is as follows:[e9c9e17fy.feishu.cn](https://e9c9e17fy.feishu.cn)

## Material Submission Requirements

### 1. Course Completion Report (PDF format)

Report requirements are as follows:

 [Final Report Outline](#)

The report format is as follows:

 [\(Appendix 1\) Cover Page and Format Requirements for the Course Completion Paper of the School of Management, Tianjin Normal University](#)

Refer to the format requirements such as cover, font, indentation, numbering, etc. therein.

Example:

 [Excellent Example of 21st Level System Development](#)

**Note:**

Sample **for reference only**, in actual implementation, it is necessary to strictly **complete according to the requirements of this year**.

### 2. System Code Related Materials

Uniformly upload the Compressed Packet containing source code, resources, and operating instructions. If you can provide the corresponding online operating environment and it runs properly, you may receive appropriate bonus points.

### 3. Video Recordings (2): All submitted in the form of links

- System delivery process: It is required to be real and effective. There should be detailed recordings of the actual hands-on process of users.
- System Demonstration Process: The demonstration requires a detailed explanation of the overall system, a display of **core code** and a demonstration of **key functions** in operation.

### 4. Delivery Receipt (showing delivery time, target user, delivery steps, satisfaction, and user signature)

Target User contact information needs to be submitted privately for subsequent random checks. If the user cannot be reached after three attempts, **the score for the final delivery section will be 0**, and according to the course rules, **all subsequent bonus points will be cancelled**. Moreover, **an investigation will be launched**, and if other issues such as plagiarism, cheating, or fraud are found in system analysis, design, and implementation, liability will be pursued.

Number of Deliveries: At least one; if the project targets different user groups, multiple deliveries are also acceptable, but each delivery must be complete, as overly brief deliveries will affect the score.

| Delivery Receipt                  |  |
|-----------------------------------|--|
| Delivery Time                     |  |
| Delivery Object<br>(Target User)  |  |
| Delivery Steps                    |  |
| User Evaluation<br>(Satisfaction) |  |
| User Signature                    |  |

### 5. On-site presentation during class

Not allowed to use slides, whiteboard + handwriting (same as the usual requirements for excellence evaluation)

Describe the advantages, demonstrate in-depth thinking and design, and the presentation time is within 3 minutes, strictly prohibit exceeding the time limit.

The entire presentation process will be video-recorded by the teaching assistant.

Presentation may be completed after the teacher questions and suggestions session .

## **Composition of Final Grades**

### **Basic Score**

- Correctly functioning system: 20 points
- Complete Development Document: 20 points
- Successful Delivery: 20 points
- Peer Review: 10 points (affects the score of the evaluation group, not the score of the evaluated group)

The above scores (70 points in total) will serve as the group's basic score

### **Bonus Points**

- Sign up for the merit evaluation. Teaching assistants will select 10 groups to participate in the final merit evaluation presentation, randomly select 2 other groups for review. The order of the merit evaluation presentation: first the merit evaluation groups, then on-site random inspection review group
- For groups that pass the merit evaluation, each group's final grade will be increased by 10 points.
- After the evaluation and review, the whole class will vote (3 votes from the teacher, 1 vote from the teaching assistant, and 1 vote from each group) to select the top groups at the end of the semester (6 groups). Each top group will receive an additional 10 points (cumulative 20 points) in their final grades
- The group with the highest number of votes will be the final winning group, and the final grade of the winning group will be increased by 5 points (cumulative 25 points).
- When a tie occurs in the vote, a targeted revote will be held.

### **Role Bonus**

- Each time a weekday computer task is completed, the team leader of the development group will receive an additional 1 point in their individual final grade
- Each group that passes and is rated excellent in the regular computer lab experiments will receive an additional 3 points for their final course grade

- Each time a lecture is given, the student with the highest total score will have their individual score converted to an additional 3 points in the final grade
- Class representative's final grade +20 points

**Note:**

- Only development teams that have successfully delivered can receive additional scores
- At the end of the term, all grades will not have decimals and will be calculated by rounding off.
- For those with a final total score exceeding 100 points, it shall be calculated as 100 points and cannot be added to other items such as usual performance or computer-based test scores.

**Final Demonstration Class Process**

**Note:**

- This is for viewing materials of each group during the evaluation [📄 2025年信息系统开发期末材料提交与互评](#) .
- The final report must be submitted in hard copy (to be collected by the end of class on June 16).
- The excellent evaluation group of each experiment (the paper version of the current experiment needs to be submitted separately, and all will be collected during class on June 16)

| Previous Experiment Excellence Groups | Excellence Groups |
|---------------------------------------|-------------------|
| First                                 | 9, 18, 15         |
| Second                                | 4, 6, 10          |
| Third                                 | 12, 19, 4         |
| Fourth                                | 6, 7, 12          |
| Fifth                                 | 2, 5, 11          |
| Sixth                                 | 4, 5, 13          |
| Seventh                               | 4, 11, 12         |
| Eighth                                | 5, 7              |
| Ninth                                 | 4, 6, 12          |
| Tenth                                 | 2, 4, 7           |
| Eleventh                              | 8, 10, 18         |
| Twelfth                               | 5, 7, 18          |
| Thirteenth                            | 8, 15, 17         |
| Fourteenth                            | 5, 6, 11          |
| Fifteenth                             | 7, 10, 12         |
| Sixteenth                             | 8, 11, 12         |
